English and Romanian

TOOLS I USE EVERY DAY

Shopify Liquid Dawn
Horizon JavaScript
TypeScript React Router
Polaris
Shopify Admin GraphQL API
App proxy
Metaobjects & metafields
Shopify Functions
Checkout UI extensions
WebAssembly Meilisearch
InstantSearch Klaviyo
HubSpot JSON-LD & SEO
Prisma Vitest Laravel
HTML & CSS

EDUCATION

Babeş-Bolyai University
Economic Informatics, 2021 to
2024

IT School
Front-End Web Development
certification, 2023

Emanuel Rusu

Shopify developer · Founder of REMTA Digital

I build custom Shopify themes, features and apps, mostly for larger stores that sell in several languages and markets and need to talk to an ERP, PIM or search service. Since 2023 I have worked on 36 Shopify projects, listed with screenshots and details at remtadigital.com.

Experience

REMTA Digital

Dec 2025 to today

Founder and Shopify developer. My own one-person company for Shopify projects.

aiconomy AG

Apr 2025 to today

Shopify developer on multilingual Swiss stores connected to aico's cloud ERP, POS and PIM: frontend, custom functionality, discount logic and custom apps.

- **EV Zug:** a Cart Transform Function in TypeScript, compiled to WebAssembly, that merges a personalised jersey into one line in cart and checkout; the live auction page and the order emails. 325 of the store's 907 commits are mine.
- **Curaprox:** the Swiss and UAE stores on one shared Horizon theme, with content resolved per store from the PIM. A colour-variant product page went from 16.2 MB to 4.5 MB.
- **PrestaShop to Shopify migration app:** customers and order history imported into a live store without a single customer email, enforced by a release-blocking test; 17 test suites.
- **Inuikii:** a Meilisearch search and collection layer with colour grouping and market-aware prices, plus a B2B showroom, an influencer store and a checkout app.
- **Also:** FC Basel 1893, FC St. Gallen 1879, FC Zürich (collection and product pages at least 30% faster), Confiserie Sprüngli, Nile, Lush Switzerland, Revendo and more.

WebGurus

Oct 2023 to Mar 2025

Shopify developer on custom themes for US clients, after starting there as a mobile app developer and full stack intern.

- **Tshirts.com:** my first fully custom theme, built from scratch, then optimised until the page was loaded and usable in under 2 seconds, down from over 9.
- **Also:** American Stationery, Brand Depot and Cosmic Clothing.

How I work

- I agree on scope and trade-offs in plain language before I write code.
- I build on a staging store and ship in small, reviewable steps.
- Several languages and markets are the default for me, not an afterthought.
- I leave code your own team can read and keep working on.
